

# Bachelor of Management Information Systems

COLLEGE OF  
**BUSINESS**  
كلية الأعمال

Data is everywhere, location-based from smart phone, social media, corporate data and more. Organisations need to analyse such data to get meaningful and powerful information to people who need it. Management Information System (MIS) department relies on technology-supported techniques for exploring, analysing, combining, visualising, and reporting such data to enable fact-based decision making and enterprise wide management.

*Quality education intertwined  
with cultural advancement*
